5. **General description or background of proposed request. Attach executive summary if more space needed:**

The Office of Climate Action, Sustainability, and Resiliency (CASR) has received a grant award from the Colorado Department of Local Affairs for \$2 million in state funds (complemented by \$666,667 from the Climate Protection Fund) under the Microgrids for Community Resilience program. This project proposes to leverage an existing 447 kw-DC rooftop solar system by integrating an energy storage system and all related materials and equipment to establish energy resilience at Abraham Lincoln High School and the surrounding area. The school has experienced power outages in the past and this system would all but eliminate any future disturbances as well as enabling the facility to operate 'off-grid' and relieve grid stress for the neighboring areas to prevent wider system impacts. Student engagement during design and operating phases will provide learning opportunities that will help shape the energy leaders of tomorrow.
