Agenda

- Existing Facility
 - New Animal Center Location
 - Rezoning/ Special Use Permit
 - Program Summary
 - Site Planning
 - Animal Shelter Best Practices
 - Building Plan
 - Sustainable Design Components
 - Project Schedule
- Questions

Purpose

- **Present the Schematic Design for the new Animal Center**
- **Review two design alternates**
- **Seek Board Approval of Schematic Design for January 20th meeting**

Background

Facility History and Site Selection

Current Animal Shelter Facility

New Animal Center Site

Rezoning & Special Use Permit

- Rezone portion of southern Randleigh Farm Parcel for new Animal Center
- City of Raleigh Jurisdiction
- Current R-4 zoning does not permit animal center facility
- Rezoning approx. 24 acres to Mixed Use Industrial IX-5
- Special Use Permit required

Program Summary

- **Building Area: 56,400 SF**
- **Exterior Covered Area: 8,000 SF**
- **265 Dog Kennels (Project Goal)**
- **184 Cat Kennels**
- **Four Separate Public Entrances**
 - Pet Adoption
 - Veterinary Services
 - Foster Services
 - Pet Surrender and Redemption
- **Animal Control Entrance Separate and Secure**

Animal Housing Capacity

	Existing Shelter	New Animal Center
Building Area	25,160 SF	54,600 SF
Dog Capacity	135	265*
Cat Capacity	121	184

* Project goal capacity dependent on alternate #1

Site Planning

BUILDING & SITE

- One story building area of 54,600 SF
- Bid Alternate 1 – Training Center
- Bid Alternate 2 – full Dog Kennel Capacity
- Public Parking (Front) - 79 cars
- Staff Parking (Rear) - 49 cars
- EV Charging Spaces
- Fleet Parking (Rear)
- Sallyport – Animal Drop-off

Site Planning

BUILDING & SITE

- Landscaping to buffer noise and views of back
- Perimeter Fence to contain noise and views
- Walking trail for volunteers walking dogs
- Native drought tolerant plants and materials
- Preserve existing pond for storm water management
- Tree conservation areas

Animal Shelter Best Practices

- **Best Practice Animal Housing Design**
 - **Dogs**
 - **Cats**
- **Biological Risk Management**
- **Efficiency of Veterinary Services**
- **Safe, Customer-Focused Public Areas**

Animal Housing

Driver of Square Footage and Layout:

- **Double Compartment Housing**
- **Dog Standard Widths:**
 - 4' minimum, 5' wide better, some 6'
 - Options for indoor / outdoor
 - Options for all indoor
- **Cat Standards**
 - 2'-6" x 5' wide cat kennels

Biological Risk Management

- **Dedicated Isolation Areas for ill or At-Risk Animals**
- **Separation of Incoming Pets**
- **Reduction of Stress**
 - **Quiet Space for Cats**
 - **Quiet Space for Dogs**
- **Preventing Spread of Disease**
 - **Drainage Design**
 - **HVAC Design**

Efficiency of Veterinary Services

- Design for Task Efficiency
- Design for Efficient Space Usage
- Design for the Future
- Design for High Volume

Safe, Customer-Focused Public Areas

- **Dedicated Staff Zones for Safety**
- **Separation of Customers by Service**
- **Inclusion of Exam and Counsel Rooms**
- **Positive, Professional Feel**

Overall Floor Plan – Sections A, B, & C

Floor Plan Section A

Floor Plan Section B

Foster, Surrender/Redemption, and Dog Isolation Kennels

Floor Plan Section C

Dog Kennels: 234 Base Bid + 31 Alternate = 265 Kennels

Floor Plan - Outbuildings

Training Center and Warehouse

Training Center
Alternate 1
