5. General description or background of proposed request. Attach executive summary if more space needed:

Denver Fire Department’s (DFD) training infrastructure (i.e., buildings and grounds) closely represents the built environment of the City and County of Denver. The training grounds features aspects of the city including representative lots, streets, signage, utility services, and parked vehicles to challenge our firefighter’s ability to respond to emergencies. The lots within the training grounds includes realistic setbacks (10’-50’), landscaping, hardscaping, fences, and parking (in various configurations) for the different occupancies.

DFD needs multiple burn structures that represent a variety of occupancy types for training (e.g., single-family, multi-family, high-rise, and commercial). A single burn structure should not try to represent multiple occupancy types. The configurations of these structures help facilitate specific **skills, drills, and evolutions** (e.g., stretching, hose advancement, fire attack, search, ground ladder throws, and ventilation).

This Design-Build contract with Evergreen Industrial Ltd. will provide DFD with a temporary three-story, class A, burn structure integrated with protected walls (burn rooms) for class A fires on two levels and a ventilation roof prop. This structure is meant to represent a direct-exit apartment building for DFD training purposes. This project is non-occupiable, connects to no utilities, is meant to burn, and will be used by DFD for training purposes only.
